

TEST PLAN AND TEST CASES

The Meera Online Jewellery E-Commerce Platform was tested to ensure that all major functionalities worked correctly and provided a smooth user experience. Testing was performed by checking different features of the website manually and verifying whether the actual results matched the expected results.

1. Testing Method

- **Manual Testing**
- **Functional Testing**
- **UI Testing**
- **Navigation Testing**
- **Search Testing**
- **Product Details Testing**
- **Cart and Wishlist Testing**
- **Responsive Testing**

The website was tested by opening different pages and interacting with the available buttons, links, search fields, product cards, filters, and other user interface elements. Each functionality was checked using different inputs and the actual output was compared with the expected result.

2. Test Cases

- **TC01 – Website Loading**

The website was opened in the browser to verify that the home page loaded correctly without any major errors.

Expected Result: The website should load successfully and display the home page.

Actual Result: The website loaded successfully and the home page was displayed correctly.

Status: Pass

- **TC02 – Product Search**

Expected Result: Relevant products should appear for the entered keyword.

Actual Result: Relevant products were displayed correctly.

Status: Pass

- **TC03 – Product Details Page**

Different jewellery products were selected to verify whether their complete product information was displayed correctly.

Expected Result: The selected product should display its image, name, price, description, specifications, rating, stock information, and other relevant details.

Actual Result: Product details were displayed correctly.

Status: Pass

- **TC04 – Product Images**

Product images were checked to verify that the correct images were displayed for the selected jewellery product.

Expected Result: Product images should load correctly and display the selected product.

Actual Result: Product images loaded and displayed correctly.

Status: Pass

- **TC05 – Product Rating and Reviews**

The rating and review information displayed on the product interface was checked.

Expected Result: The product rating and review count should be displayed correctly.

Actual Result: The rating and review count were displayed correctly.

Status: Pass

- **TC06 – Quantity Management**

The quantity controls on the Product Details Page were tested by increasing and decreasing the product quantity.

Expected Result: The product quantity should increase or decrease correctly when the respective buttons are selected.

Actual Result: Quantity was updated correctly.

Status: Pass

- **TC07 – Add to Cart**

Products were added to the shopping cart to verify whether the selected product was correctly added.

Expected Result: The selected product should be added to the shopping cart.

Actual Result: Products were successfully added to the cart.

Status: Pass

- **TC08 – Add to Wishlist**

The Add to Wishlist functionality was tested using different jewellery products.

Expected Result: The selected product should be added to the wishlist.

Actual Result: Products were successfully added to the wishlist.

Status: Pass

- **TC09 – Navigation**

Navigation links and buttons were tested to verify movement between different sections and pages of the website.

Expected Result: Users should be redirected to the correct page or section.

Actual Result: Navigation worked correctly.

Status: Pass

- **TC10 – Responsive Design**

The website was tested on different screen sizes to check whether the layout and content were displayed properly.

Expected Result: The website should adjust correctly according to different screen sizes.

Actual Result: The website displayed correctly across different screen sizes.

Status: Pass

3. Expected and Actual Results

- **Expected Results**

All major website functionalities should work according to their intended purpose without errors, and the user should be able to browse and interact with the website smoothly.

- **Actual Results**

The tested functionalities worked as expected. Product searching, product details, ratings, quantity management, cart, wishlist, and navigation were functioning correctly during testing.

4. Bugs Identified

- Minor UI alignment issues were checked and corrected during development.
- Product display and responsive layout issues were tested and adjusted where required.
- Search and product filtering behaviour was tested with different inputs.
- Button and navigation functionality was checked to identify incorrect links or interactions.
- No major functional bugs were observed in the final tested version.

5. Bug Status

- **Critical Bugs:** None
- **Major Bugs:** None
- **Minor Bugs:** Resolved
- **UI Issues:** Resolved
- **Functional Issues:** Resolved

6. Final Testing Status

- **Overall Testing Status:** Passed
- **Major Functionalities:** Working
- **UI/UX:** Satisfactory
- **Navigation:** Working
- **Search:** Working
- **Product Details:** Working
- **Reviews/Ratings Display:** Working
- **Cart:** Working
- **Wishlist:** Working
- **Responsive Design:** Working
- **Final Status:** PASS
